

PETID Agent v2.0

Autonomous AI and Zero-Knowledge Blockchain for Lost Pet Recovery

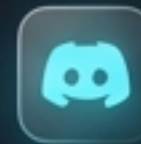

Acting in **seconds**, not days.

Syscoin PoB IV Finalist

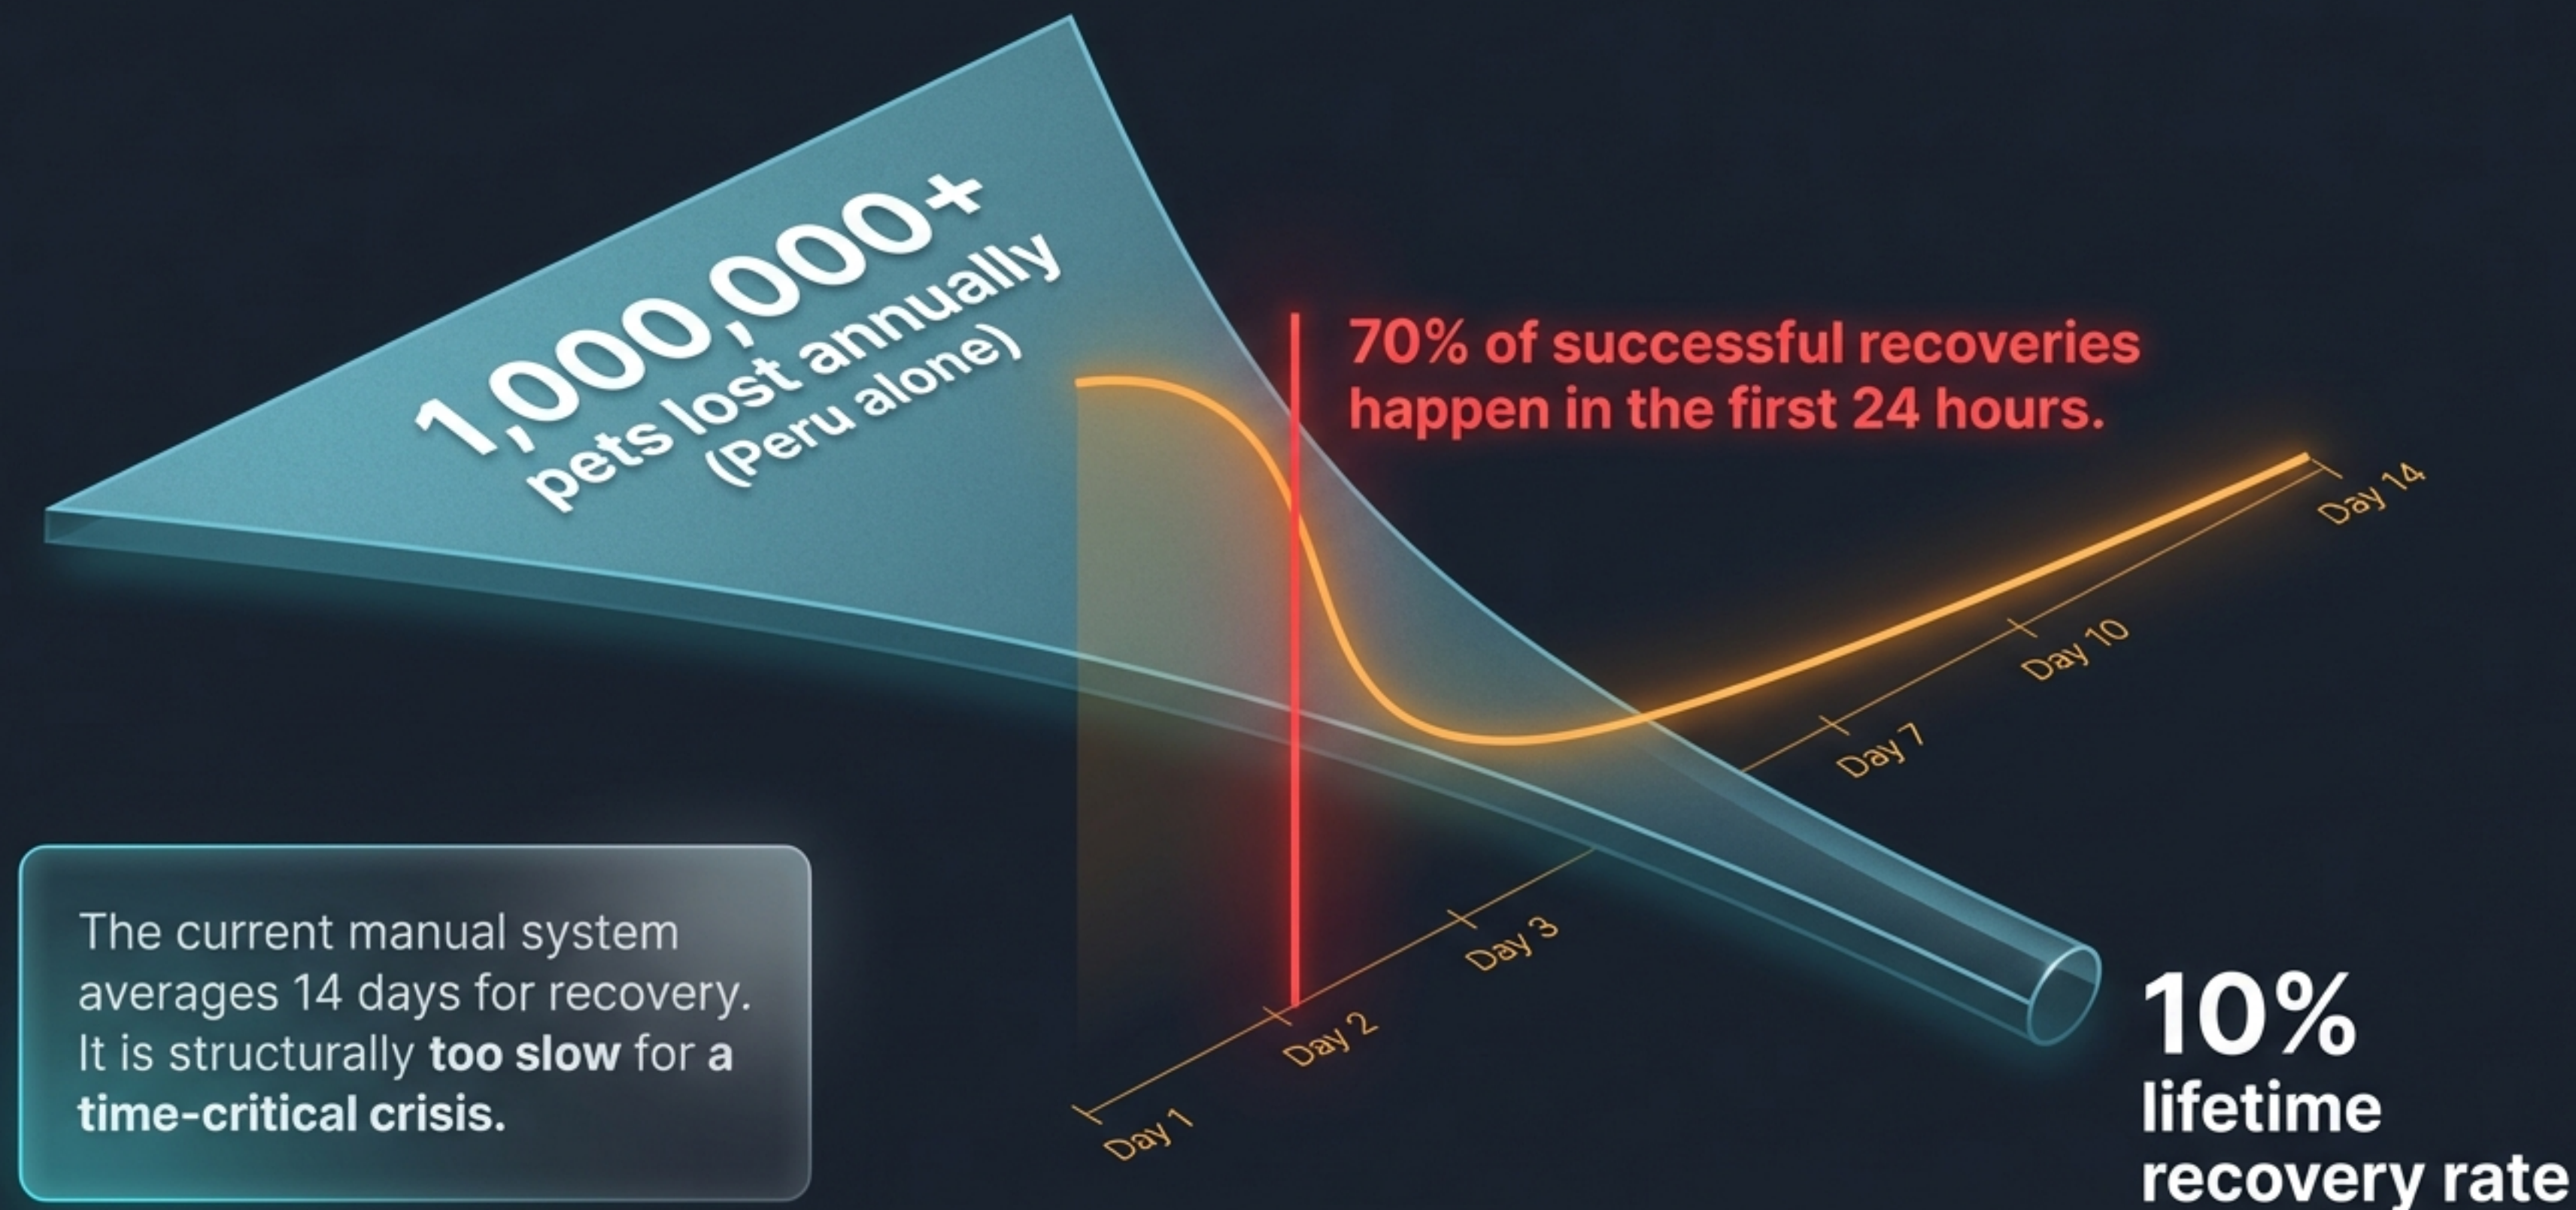

Telegram

Discord

The 24-Hour Critical Window

The Paradigm Shift in Pet Recovery

Traditional Recovery

Method: Manual & Siloed

Speed: Days or Weeks

Distribution: Unverified Facebook groups

Transparency: Fragmented Black Box

PETID Agent

Method: Autonomous & Agentic

Speed: < 10 Seconds

Distribution: 23+ Verified LatAm Hubs

Transparency: Immutable On-Chain Records

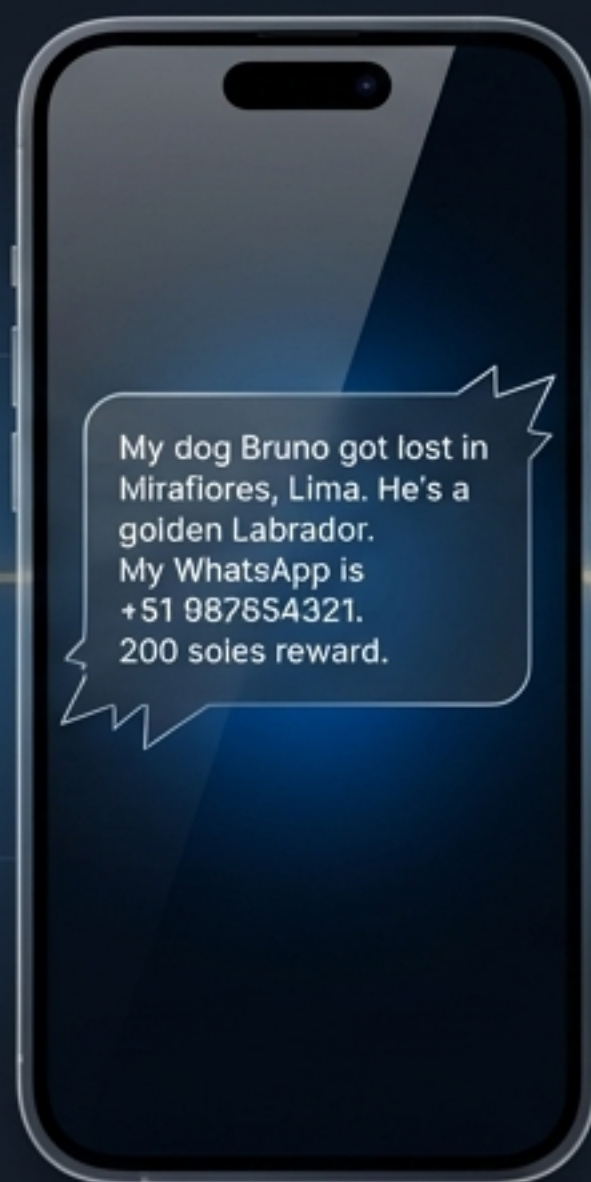

The Autonomous Brain

This is not a chatbot. This is an agent executing real-time tools.

Frictionless Execution from Pure Panic

1. The Panic

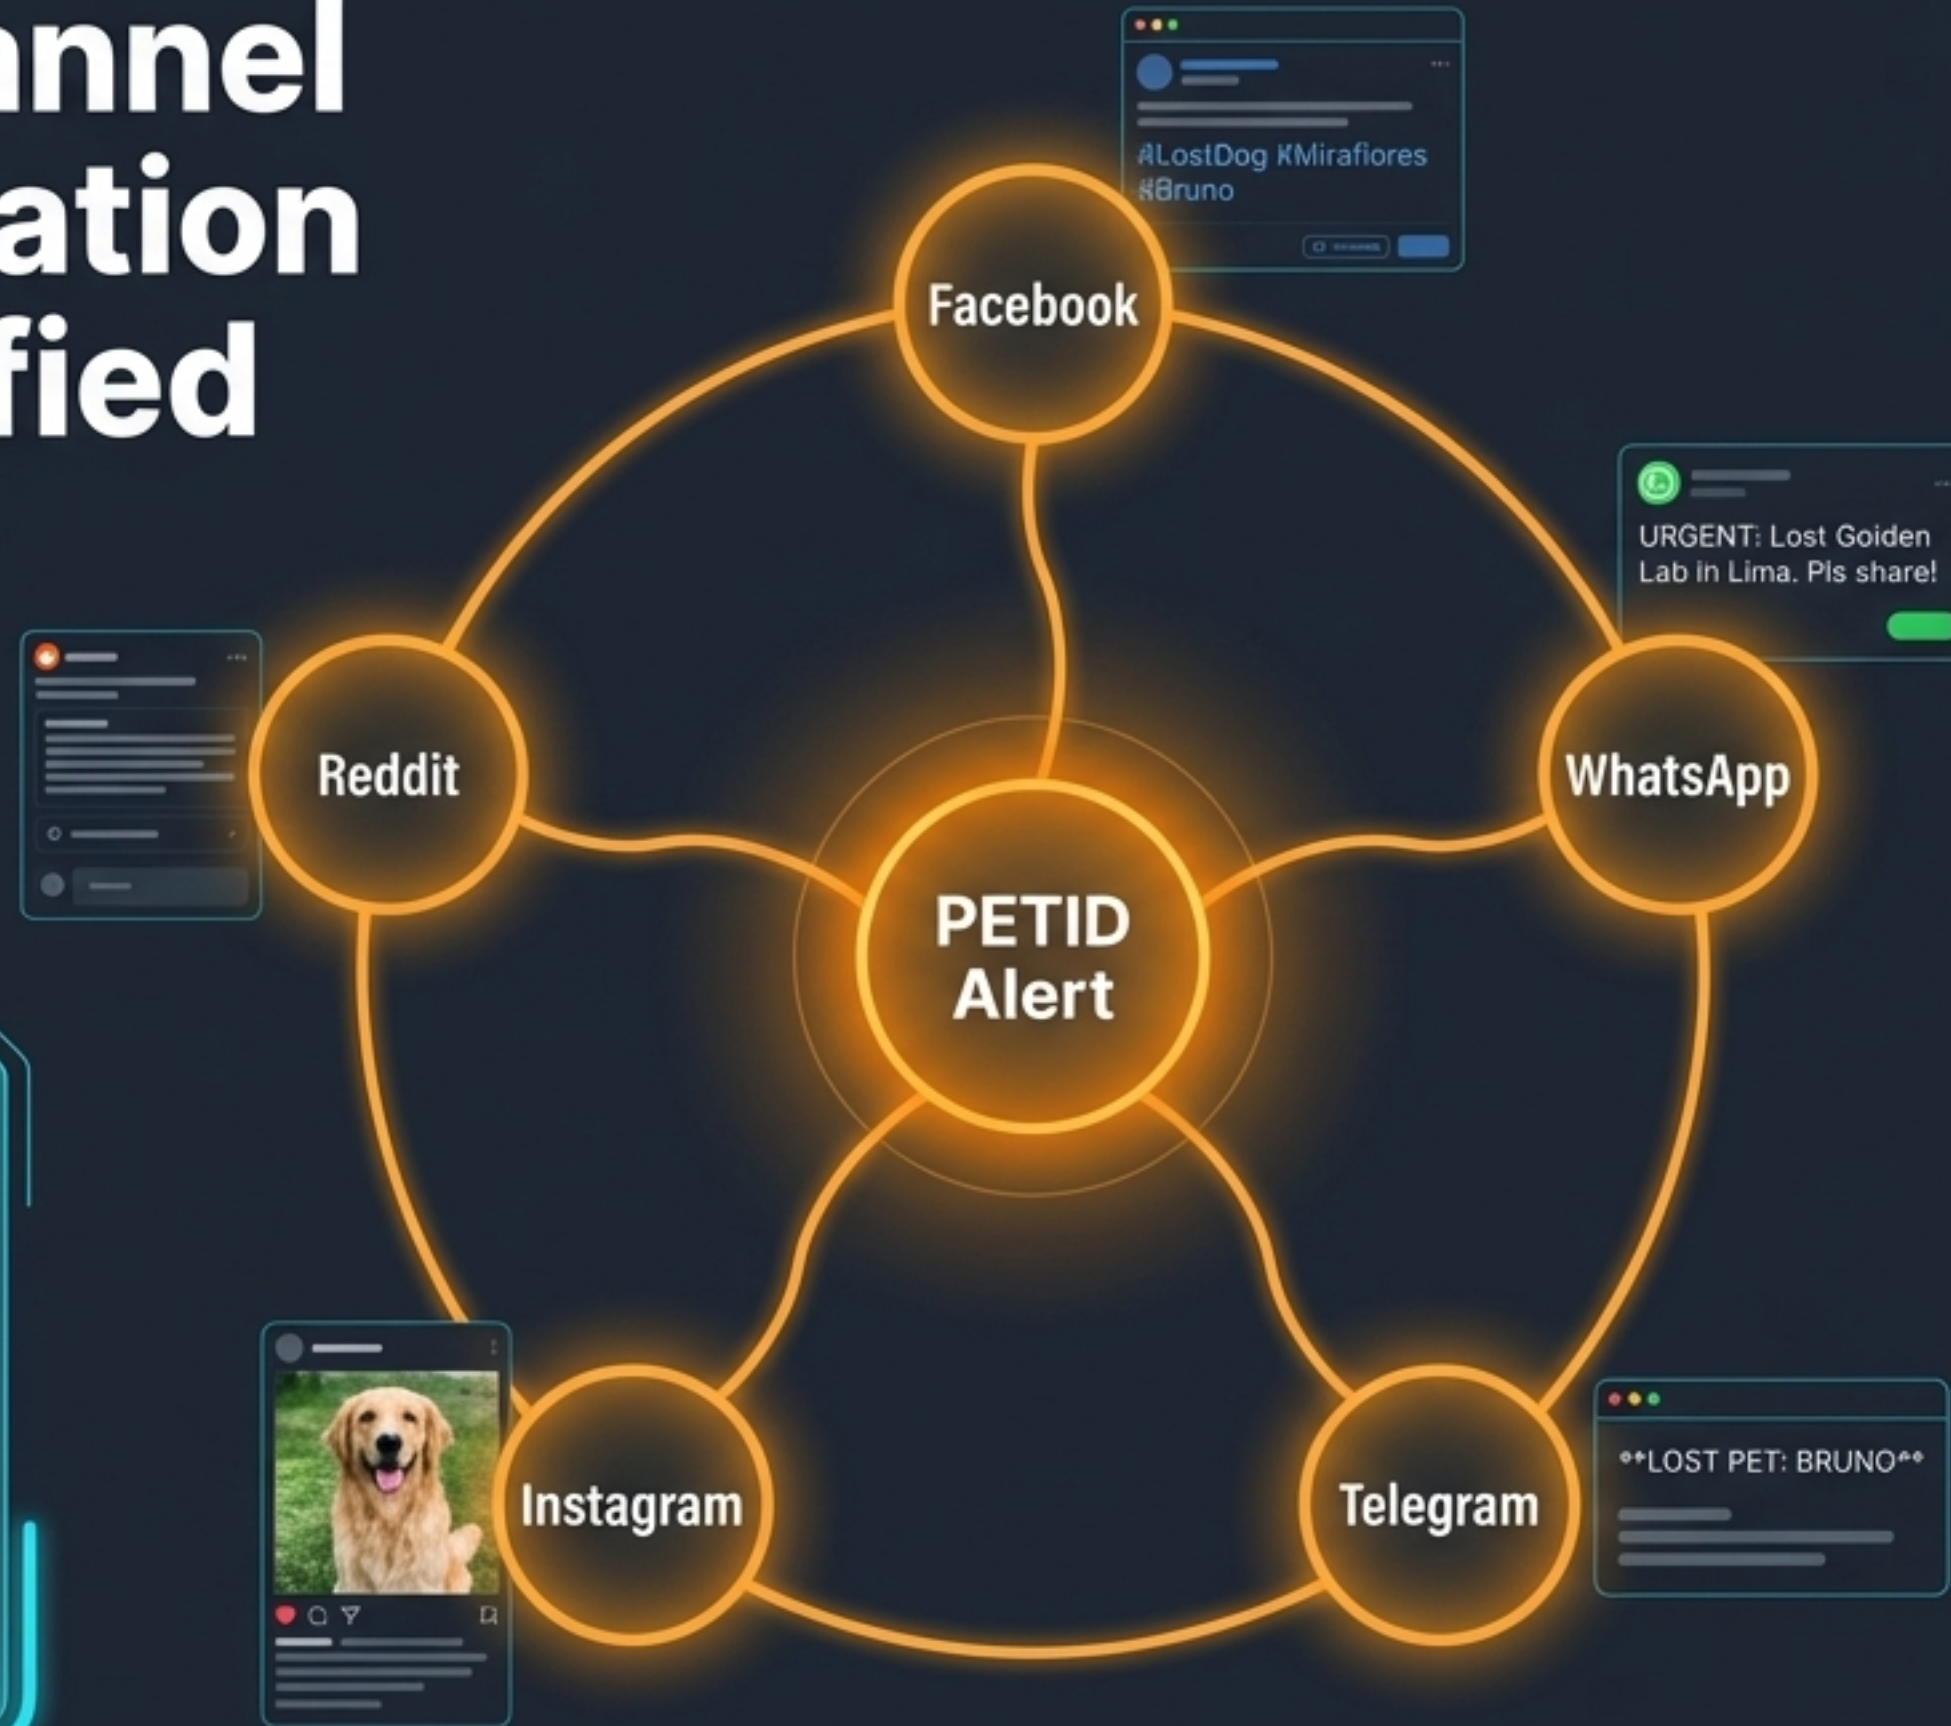

2. The Agentic Loop

3. The Action

Omnichannel Amplification and Verified Hubs

The Network:

Actively indexing 23+ fully verified, real-world recovery URLs across Latin America (Peru, Colombia, Mexico, Argentina, Chile).

Core Philosophy:
Honest sharing. We empower users with the exact tools and destinations to go viral immediately.

Immutable Transparency via zkTanenbaum

Network

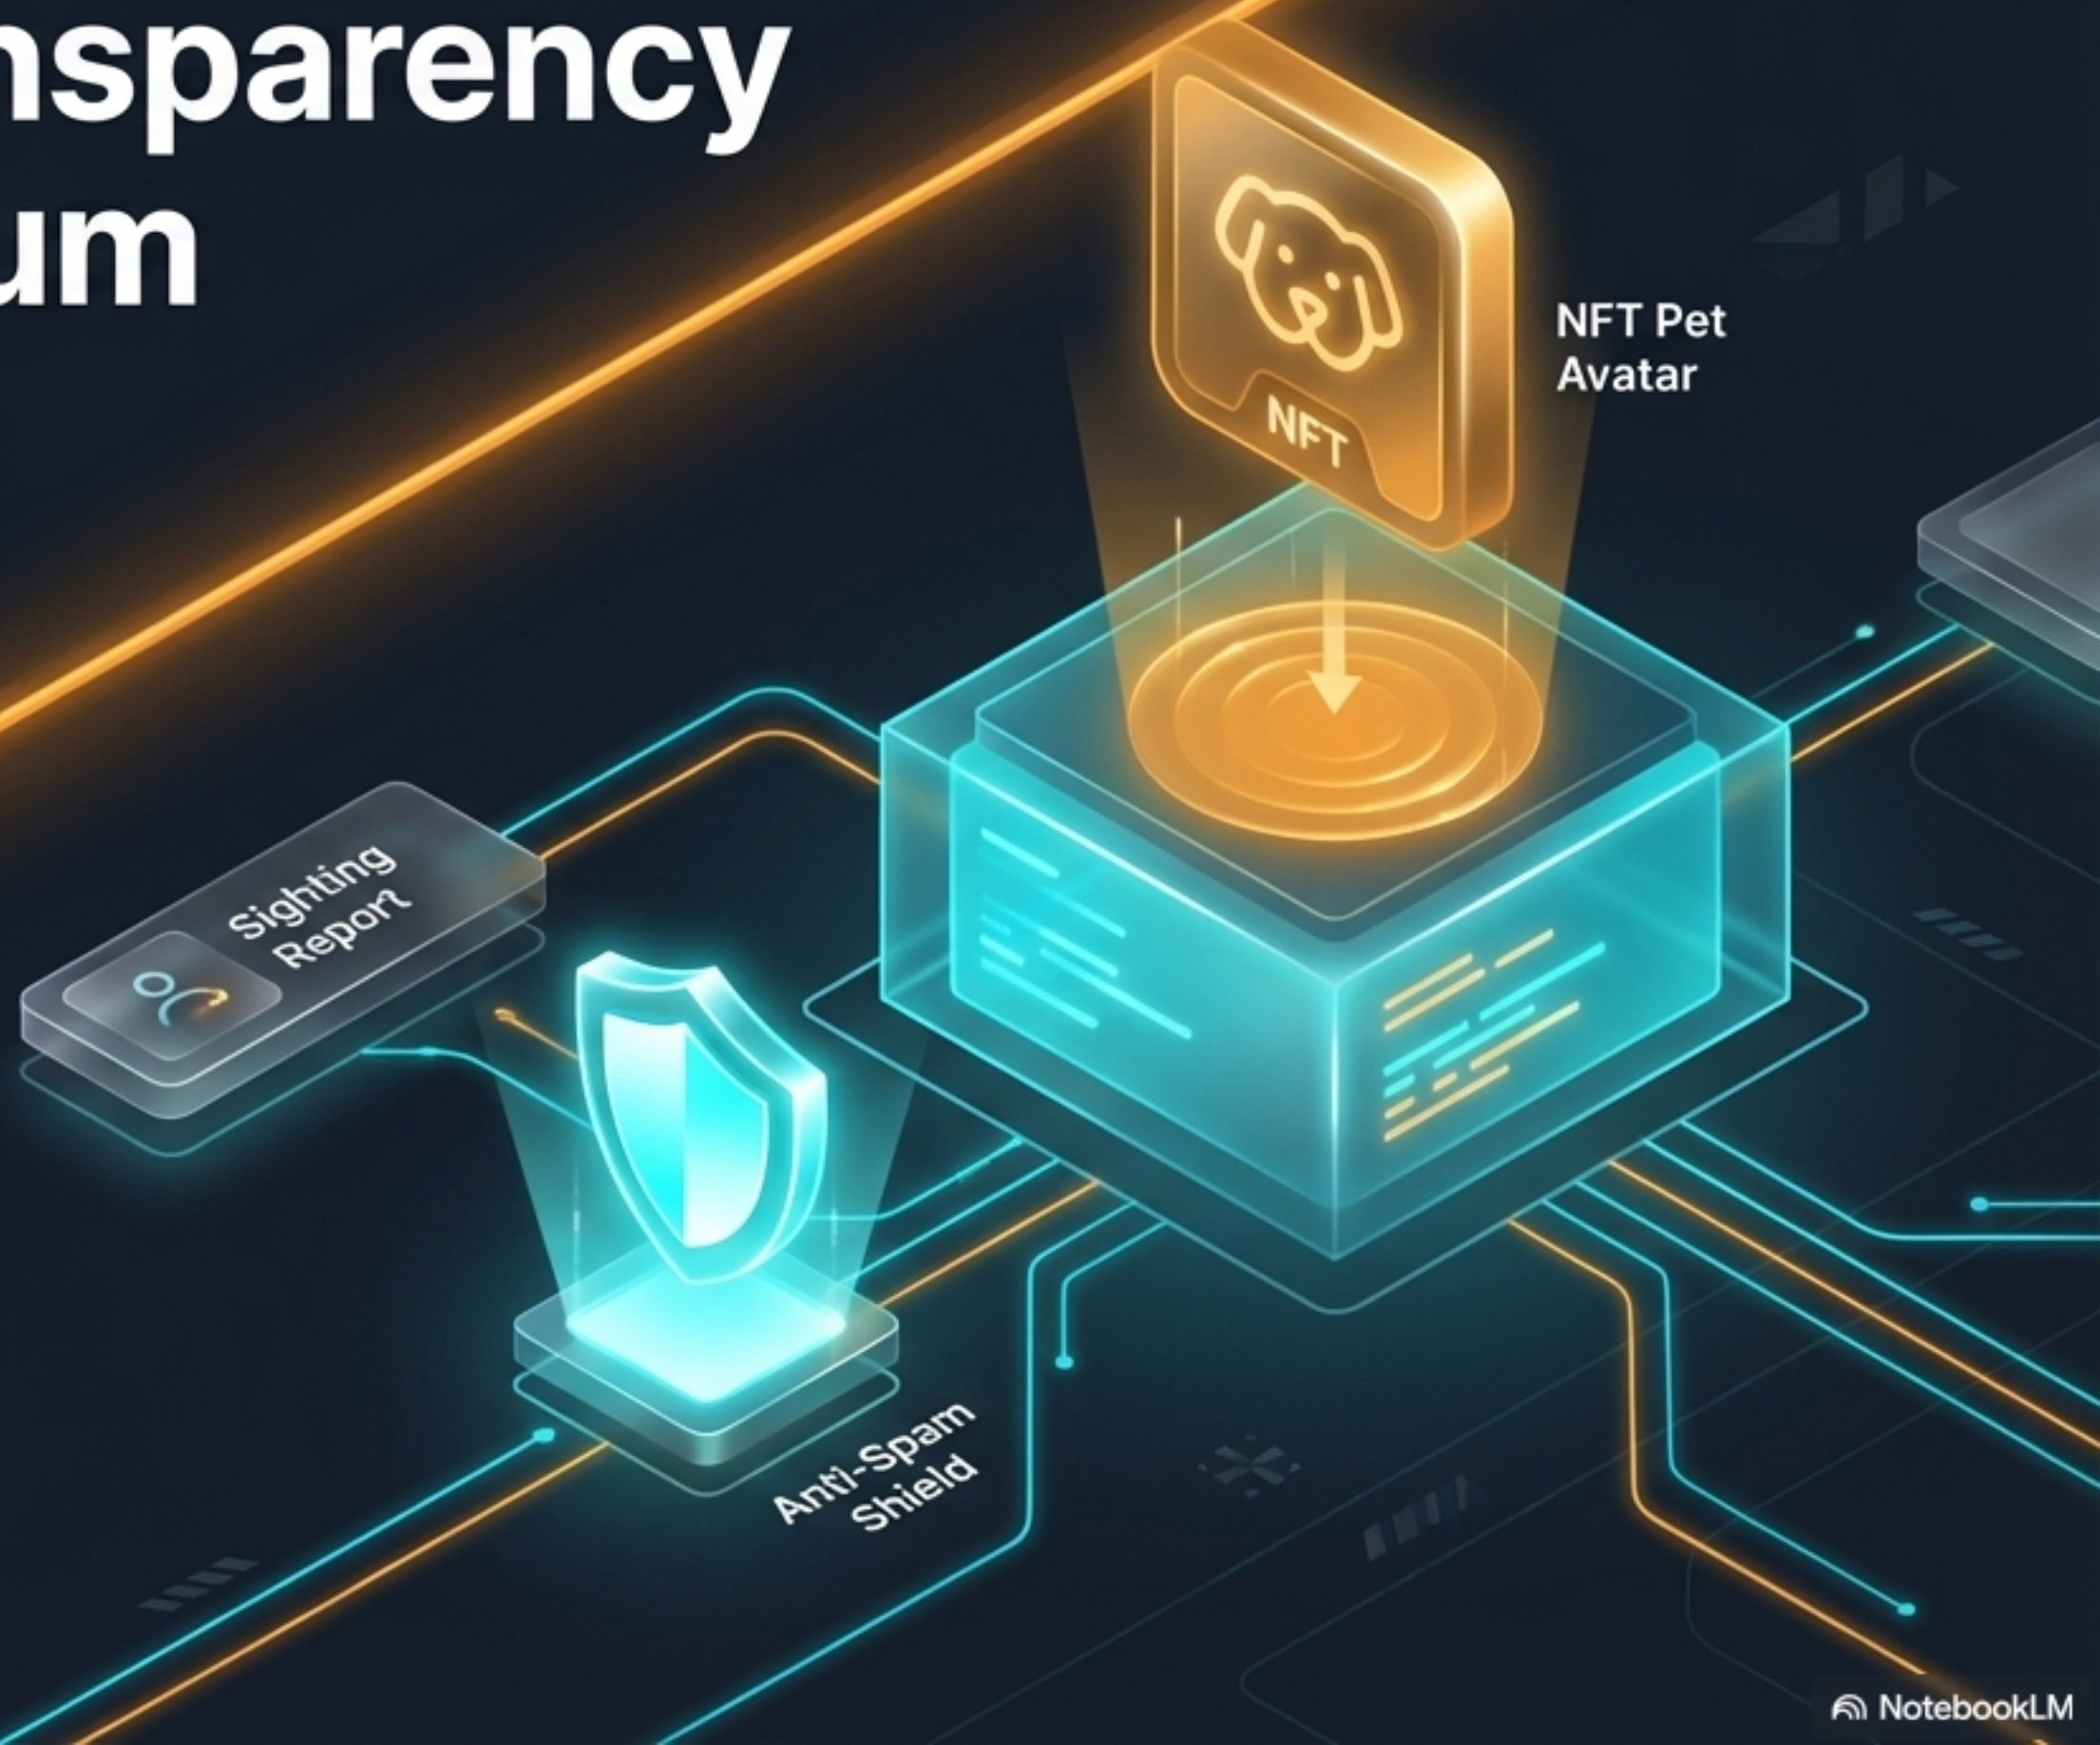

Syscoin zkTanenbaum Testnet
(Chain ID 57057)

Smart Contract Core Functions

- ERC-721 Pet Registration
- Lost Mode Activation
- Case Resolution

Why Web3?

A complete, verifiable audit trail. The staking mechanism prevents spam/scam sighting claims, ensuring only high-signal data reaches panicked families.

Under the Hood: The Technical Stack

The Business Engine

Freemium

Basic Alerts: Free

Premium

Priority Alerts: \$2.99

AI Search: \$0.99

Shelter Dashboards:
\$49/mo

Financial Projections: Scaling from 50k users / \$180K MRR (Y1) to 1M users / \$3.6M MRR (Y3).

The Triple Moat

Emotional (Urgency)

The 24-hour crisis creates massive, immediate willingness to pay, while every successful reunion generates organic, viral marketing.

Technological (Data)

Proprietary verified LatAm group index + Immutable on-chain history + Agentic action.

Network (Scale)

More Users → Better AI Context
→ More Found Pets → More Users

Vision and Roadmap to 2036

Phase 1 (Now)

The MVP. Functional Telegram/Discord Agents, zkTanenbaum Smart Contracts, 23 Verified LatAm Hubs.

Phase 2

Expansion. Full LATAM rollout, Mobile App, NFC Collar Scanners, Syscoin Mainnet PET Token.

Phase 3

Global Protocol. Open node running, Multimodal AI for visual pet recognition.

Phase 4 (2036)

Complete Ecosystem. Fully autonomous specialized agents, global shelter network integration, DAO for animal protection.

Bringing Bruno Home

“The most powerful technology isn’t the one that moves the most money. It’s the one **that brings Bruno back home.**”
